

Oximio expands its global network of bonded depots

Supplying Southeast Europe via the bonded depot in Serbia provides a 50% cost saving compared to established direct-to-site models. Oximio also offers JIT and additional relabelling, expedited customs clearance and rapid delivery.

Our customs bonded service offers:

- Phased duty and VAT payments with bulk shipments
- Smart stock labelling solutions
- Easy returns of unused IMP
- Licenced warehouse
- One depot set up for multiple countries
- IoR and import/export licences
- Rapid delivery methods
- Controlled site deliveries
- Centralised inventory management
- Waste minimisation

The chart above highlights the significant cost savings made by a US-based sponsor who used Oximio's bonded depot for storage and distribution in preference to established models.

Optimising the Gateway into Southeast Europe

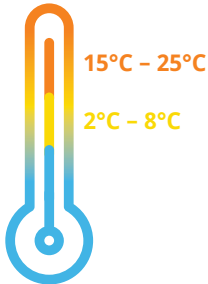

Oximio is changing the landscape of clinical trials in Southeast Europe, with increased efficiency and centralised supply chain governance.

Usage of Oximio's bonded depot allows for bulk shipment imports and 50% cost savings in comparison to direct-to-site models, which involve higher costs relating to requirements for multiple deliveries

Since 2020, Oximio has shaped the cold-chain infrastructure in Serbia to improve quality and expedite the timelines of multinational clinical trials.

Oximio is a highly trusted service provider and aims to reach greater patient populations in Serbia and the surrounding countries in a fast, efficient manner whilst maintaining quality oversight every step of the way. Supply chain logistics are managed via the Serbia depot with distribution into a range of countries, including Bosnia and Herzegovina, Moldova and North Macedonia.

End-to-end Cold Chain control system
